

1. Read a letter and print its next letter do not use DL
[M/c of Mov DL,AL]
2. Read a letter and print its double in ascii 2->d \$->H
no add,mul Use SHL BL,1 and put its m/c code
3. Read two letters and print bigger [put m/c code of
JG/JL and Jmp]
4. Read 5 letters and print them in reverse order. Do
not use [] in your program m/c code of mov [si],al Mov
dl,[si]
- 5: mov bl,250 mov bh,68 add bx,340 mov ah,2 mov
dl,bl int 33 mov dl,bh int 33 mov ah,76 int 33 m/c
add bx,340 [4 bytes]
- 6: In above add bx,75 [m/c in 3 bytes Hint use s=1]
- 7: Read a letter and print its next letter do not use DL
[M/c of Mov AL,DL with d=0 it will make it mov dl,al]
